“The ISR Matrix; Beneath the Surface”

The training theme of the 2017 summit is **Unity of Tactics & Strategy through the Use of Force Continuum**. Building on our foundation of subject control (day 1 & 2) and firearm retention (day 3), we will be introducing our close quarter curriculum with the Clutch System (Day 4 and 5) for two days of its hand to hand approach. We will also showcase its counter knife and defensive blade module into that material and re-integrate that module right back into our subject control and retention work from the previous days.
